Winner selection and qualifying criteria

Technology Fast 500 provides a ranking of the fastest-growing technology, media, telecommunications, life sciences, and energy tech companies—both public and private—in North America. The 2020 Technology Fast 500 award winners are selected based on percentage fiscal year revenue growth during the period from 2016 to 2020.

In order to be eligible for Technology Fast 500 recognition, companies must own proprietary intellectual property or proprietary technology and it must be sold to customers in products or services that contribute to a majority of the company's operating revenues. Companies must have base-year operating revenues of at least \$50,000 USD, and current-year operating revenues of at least \$5 million USD. Additionally, companies must be in business for a minimum of four years and be headquartered within North America.

The rankings are compiled from applications submitted directly to the Technology Fast 500 website, and public company database research conducted by Deloitte LLP.
